Gobi CLI Cheatsheet v3.0.0

Spaces · Personal · Vault · Sense · Artifact

INSTALL `brew tap gobi-ai/tap && brew install gobi`
`npm i -g @gobi-ai/cli`

SETUP `gobi auth login → gobi vault init → gobi space warp`

AUTH & SETUP login, vault, space

- `auth login` · `auth status` · `auth logout`
- `vault init` · interactive vault selection, writes `.gobi/settings.yaml` + `PUBLISH.md`
- `vault list` · list vaults you own

SPACE posts in a space

- `space list` · `space warp [slug]`
- `space posts create --title --content [--artifact --attach --repost-post-id]`
- `space posts reply <id> --content [--attach]`
- `space posts recent` · `posts list` · `posts get <id> [--full]`
- `space feeds list` · `space artifacts …`

VAULT admin, publish & sync

- `vault create <slug> --name` · `rename <new>` · `delete <slug>`
- `vault publish` · upload `PUBLISH.md` to webdrive · `unpublish`
- `vault status` · show publish state & profile URL
- `vault sync [--dry-run] [--full] [--path]`
- `vault sync --conflict ask|server|client|skip` · `--upload-only | --download-only`

PERSONAL your private feed

- `personal posts recent [--limit --cursor]`
- `personal posts create --title --content [--artifact --attach --repost-post-id]`
- `personal posts reply <id> --content [--attach]`
- `personal posts list` · `posts get [--full]` · `posts edit / delete`
- private scope — posts and replies visible only to you

RECORDS notes & activities

- `personal context [--since --limit]`
- `personal activities list [--limit --before]` · `get <id>`
- `personal notes list` · `get <id>`
- `space notes list [--limit --before --mine]` · `get <id>`
- `space activities list [--limit --before]`
- read-only — audio is never exposed

ARTIFACT versioned post creations

- `personal artifacts list [--kind --limit]` · `get <id>`
- `personal artifacts create --kind [--file --content --title --vault-slug --post-id --auto-attachments]`
- `personal artifacts revise <id> [--file --content --from --change-note]`
- `personal artifacts revert <id> --to` · `history <id>`
- `personal artifacts download <id>` · `delete <id>`

COMMON WORKFLOWS

```
Share   gobi space posts create --title "..." --content "..."
Private gobi personal posts create --title "..." --content "..."
Sync    gobi vault sync --conflict client
```
